All-America

Peace

PEACE

(Plant Patent No. 591)

The only All-America selection for 1946. Golden yellow buds, edged with pink as they open that changes to canary-yellow blooms as large as 5 inches across; delicate fragrance; hardy, vigorous grower. \$2.00 each.

Taffeta

TAFFETA

(Plant Patent No. 716)

Dozens of beautiful color combinations throughout the season with this new 1948 All-America Winner. A rich carmine-rose in the bud, changing to begonia-rose in the open flower. \$1.50 each.

CAPISTRANO

(Plant Patent No. 922)

All-America Award for 1950. The big, long, beautifully formed buds have a rich shade of clear rose-pink without any other shadings, and the extremely large, full, open blooms retain the same delightful shade throughout the life of the flower. \$2.00 each.

MISSION BELLS

(Plant Patent No. 923)

All-America Award for 1950. Its pointed well-shaped buds are a deep, glowing salmon-pink, opening to full high-centered flowers in a clear shrimp-pink color. Richly fragrant, the flowers are medium to large in size. \$2.00 each.

HORACE McFARLAND

(Plant Patent No. 730)

1945 All-America Rose Winner. In the bud the color is more orange than pink, and as the big fully double flower opens it becomes a deep apricot-pink with lighter shadings of salmon and coral-pink. \$1.50 each.

FASHION

(Plant Patent No. 789)

Intense salmon-orange, quite different from any other color in Roses and one that everybody likes at first glimpse. \$2.00 each.

CHARLOTTE ARMSTRONG

(Plant Patent No. 455)

All-America Winner for 1941. Long, slender, carmine buds and brilliant open flowers of spectrum-red and cerise. \$1.50 each.

FORTY-NINER

(Plant Patent No. 792)

This startling new bicolor, an All-America Winner for 1949, reaches a new high on contrasting brilliance. \$1.75 each.

Rose Selections

Sutter's Gold

SUTTER'S GOLD

(Plant Patent No. 885)

1950 All-America Winner. Long bright yellow buds shaded red and orange. The most fragrant of all yellow Roses. **\$2.00 each.**

Nocturne

NOCTURNE

(Plant Patent No. 713)

This new 1948 All-America Rose with its long, streamlined, perfectly formed buds and large, richly textured petals is one of the finest red Roses of today. **\$1.50 each.**

Tallyho

TALLYHO

(Plant Patent No. 828)

AARS Winner for 1949. Petals of pink with the reverse a cardinal-red. Tallyho features unique coloring, beautiful form, great vigor and a rich, spicy fragrance. **\$1.75 each.**

CLIMBER HIGH NOON

(Plant Patent No. 704)

1948 AARS Winner. Is a combination of intense, clear yellow buds that seem to have captured and held the bright golden rays of the midday sun. **\$1.75 each.**

PINKIE

(Plant Patent No. 712)

1948 All-America Winner. Never has there been a Baby Rose with such perfect form as have these dainty pink buds and flowers. **\$1.50 each.**

DIAMOND JUBILEE

(Plant Patent No. 824)

1948 All-America Winner. Long, sturdy flower stems, each carrying a big ovoid bud in light pastel shades of buff, yellow, and pale orange. **\$1.50 each.**

Diamond Jubilee

LOWELL THOMAS

(Plant Patent No. 595)

Its long, tightly furled buds of rich golden yellow open into a large, graceful flower of a uniform lighter yellow. **\$1.50 each.**

MIRANDY

(Plant Patent No. 632)

All-America Winner for 1945. One of the best dark red, fragrant Roses. **\$1.50 each.**

Lowell Thomas

Mirandy

Patented

APPLAUSE

(Plant Patent No. 829)

The Bagatelle Gold Medal Winner—long lasting flowers of brilliant rose-red. \$1.75 each.

Applause

RED PINOCCHIO

(Plant Patent No. 812)

The popular Pinocchio in glowing red \$1.50 each.

PINOCCHIO

(Plant Patent No. 484)

Clusters of perfect Baby Roses in the brightest, cheeriest, yet daintiest shades of salmon flushed with gold. \$1.25 each.

BETTY PRIOR

(Plant Patent No. 672)

Ideal for mass plantings. Clusters of delicate pink blossoms in early spring and blooms throughout the season. \$1.25 each.

Pinocchio

Betty Prior

Eclipse

FANDANGO

(Plant Patent No. 894)

A new introduction for 1950. Lovely buds and breath-taking flowers of dazzling fiery orange-red. \$1.75 each.

FLORIBUNDAS

Red Pinocchio

Roses

ECLIPSE

(Plant Patent No. 172)

Distinctive tapering buds of clear yellow; abundant bloomer, vigorous grower; ideal for bouquets. \$1.35 each.

Fandango

FIRST LOVE

(Plant Patent 921)

A long slender bud of a lovely and delicate shade of pale dawn-pink, the outer surface of the petals being a deeper shade of pink. \$2.00 each.

GOLDILOCKS

(Plant Patent No. 672)

This is something different—a true Floribunda in a rich shade of golden yellow. \$1.50 each.

DONALD PRIOR

(Plant Patent No. 337)

Vivid red color, vigorous grower producing immense clusters of deep red flowers. Ideal for mass plantings. \$1.25 each.

Goldilocks

The Best EVERBLOOMING ROSES for the Southwest

We are offering these proven varieties of standard Roses of No. 1 quality bushes only. All field-grown, universal favorites. Will provide a generous supply of choice cut flowers from spring through fall.

Plant a variety of these fine Roses, and enjoy their fragrance throughout your home. For better Roses use Rose food and Rose insecticides listed on page 23 of this catalog. Keep them colorful.

TALISMAN. Perfectly formed buds of brilliant red, gold, yellow and copper, double lasting flowers, extremely fragrant, and carried on long stems. Strong and free blooming. This Rose is one of the most popular ever grown.

SOEUR THERESE. A favorite yellow Rose. Large plants with quantities of shapely golden yellow blooms; fragrant and lasting.

ETOILE DE HOLLANDE. Brilliant red, double large flowers, borne on a vigorous growing bush, make this red Rose one of our favorites.

PRES. HERBERT HOOVER. Large, semi-double blooms of cerise, pink, flame, scarlet and yellow. No Rose planting would be complete without this particular variety. Very beautiful buds, makes a large, strong bush with unusually long stems.

KAISERIN A. VICTORIA. This old favorite is still just about the best white Rose grown. The creamy white buds are long, very double, pointed, and borne on a good stem.

Etoile de Hollande

Abelia

ABELIA GRANDIFLORA

Small, bell-shaped, white flowers, borne in clusters, against a background of bronze-like foliage, making this broadleaf evergreen one of our most popular plants. Can be used in mass plantings, hedges or as sheared, formal specimens. Height about 4 feet. Hardy, and can be planted in open sun or partial shade.

	Each
12-18 inches	\$1.50
18-24 inches	2.00
24-30 inches	2.50
30-36 inches	3.00

RED-LEAF BARBERRY

Planted in the sun, this colorful plant has bright red foliage in spring and summer, deepening to a dark crimson in the fall. Its attractive red berries hang on all winter. Very attractive.

	Each
12-18 inches	\$2.00
18-24 inches	2.50

Berberis, Red-Leaved

Broadleaf

EUONYMUS JAPONICA

The heavy, dark green leaves, and ability to adapt itself to various forms, whether used as a hedge, individual shrub, or even as a semi-vine effect when trained against a wall or building, make this popular broad-leaved evergreen one of the most versatile plants we grow. It will grow 6 or 8 feet high or can be kept to 2 or 3 feet by trimming.

	Each
18-24 inch	\$2.50
24-30 inch	3.00

PAMPAS GRASS

A large growing grass with arching leaves, which attain a height of 8 feet and produce tall, feathery plumes of creamy white color in early fall.

	Each
Medium Clumps	\$1.50
Heavy Clumps	3.00

Berberis Mentorensis

BERBERIS MENTORENSIS

Strong, upright growing branches and quite formidable thorns, foliage is heavy and thick, and a dark green color. Its most valuable attribute is its ability to withstand heat and drought. During the hottest and driest weather there is never any sign of wilting or burning.

	Each
24-30 inches	\$2.50
30-36 inches	3.50

ILEX BURFORDI (Burford Holly)

A globe-shaped, compact growing plant with drooping branches and leaves. Red berries.

	Each
15-18 inches, gallon cans	\$2.50
18-24 inches, gallon cans	3.00

Evergreens

BOXWOOD

The English Boxwood grows well in the Southwest. They seem to stand the sunshine better than the other varieties, but do better if planted in partial shade. Good for formal hedges or individual sheared specimens. Fine for formal gardens.

	Each
15-18 inch, Sheared	\$5.00
18-24 inch, Specimen	7.50

CHERRY LAUREL

This fine plant makes a very large, handsome specimen, especially when sheared. Given room it will spread out in a broad, bushy tree. Splendid for tall hedges or windbreaks, and screens.

	Each
3-4 feet	\$3.50
4-5 feet	5.00
5-6 feet	7.50

The Best for the Southwest

Boxwood

Cherry Laurel

ILEX VOMITORIA (Youpon Holly)

Native Holly of Texas. Bears red berries; foliage dark green; leaves small. Compact growth makes an ideal plant for formal plantings, specimens or hedges. Height 15 feet.

	Each
18-24 inch	\$3.00
24-30 inch	4.00

PHOTINIA SERRULATA

A large handsome shrub with slightly curled, indented leaves. The new foliage in spring is a bright red. Best used around large buildings or for heavy landscape plantings. Not particular about soil or situation.

	Each
12-18 inch, gallon cans	\$1.75
18-24 inch, gallon cans	2.25
24-30 inch, 4-gallon cans	3.50

LEUCOPHYLLUM (Senisa Compactum)

Compact silvery, gray foliage massed with lavender flowers. A good plant where these colors are desired.

	Each
12-18 inch, gallon cans	\$2.00

ELAEAGNUS

A beautiful evergreen of fairly rapid growth and rather spreading habit, with silvery gray foliage and yellowish, fragrant flowers in autumn. Branches are a frosty green color with brownish mottling. 8 feet, or can be kept sheared.

	Each
18-24 inch, gallon cans	\$2.00

Elaeagnus

WAX-LEAF LIGUSTRUM

Produces large, thick, dark shiny green leaves, large clusters of white flowers in the spring with purple berries in the fall. An ideal plant for foundation plantings. Hardy as far north as Lubbock. We consider this one of our best all-around varieties.

	Each
18-24 inch	\$2.50
2- 3 feet	3.50

UPRIGHT LIGUSTRUM

A large, upright growing shrub with broad, dark green foliage much like that of a Lilac, bearing white flowers in loose sprays in spring, and black berries in winter. An excellent evergreen for large screens or against large buildings.

	Each
3-4 feet	\$2.50
4-5 feet	3.50

Wax-Leaf Ligustrum

Upright Ligustrum

Broadleaf

EVERBLOOMING GARDENIA

Much prized because of its large white, very fragrant flowers, and bright glossy green leaves. A glorious crop produced in May with a scattering of flowers through the summer. Best planted in a protected spot, in well drained soil.

18-24 inches	Each
24-30 inches	\$1.50
30-36 inches	2.50
		3.50

Everblooming
Gardenia

HYPERICUM MOSERIANUM GOLD FLOWER

A fine dwarf shrub to plant on north or east exposures, where it is almost evergreen. Beautiful double yellow flowers are produced over a long season. Dark green foliage is very handsome.

	Each
12-18 inches	\$2.50
18-24 inches	3.50

Hypericum Moserianum

MAHONIA - Orange Holly

A beautiful low-growing evergreen with striking Holly-like leaves that vary in hue from dark greens to shadings of reds and bronzes. Perfectly hardy, but is best in partially shaded spots. Has yellow flowers at the ends of the stems in spring, followed by blue berries. Excellent as a contrast plant.

	Each
15-18 inches	\$3.00
18-24 inches	4.00

Mahonia—Orange Holly

COTONEASTER PARNEYII

Large growing shrub with luxuriant deep green foliage the year around. Brilliant red berries. Most popular Cotoneaster and one of the finest shrubs for landscape planting.

	Each
18-24 inches, gallon cans	\$2.00

Goldflame Honeysuckle

Goldflame HONEYSUCKLE

(Name Trade-Marked)

A superlative variety; beautiful, hardy and versatile. The large flame-coral trumpets lined with gold, fragrant after nightfall, appear in immense, showy clusters the same year the plant is set out. Reaching its full glory of bloom in early summer, it nevertheless flowers abundantly from May until frost. Dark blue-green foliage, disease and pest free, is attractive in itself and makes a perfect background for the brilliance of the flowers. Allowed to grow naturally, Goldflame will climb a trellis or spread as a ground cover; pruned, it becomes a striking specimen shrub; while if planted in a row and sheared, it gives a fine effect as an everblooming hedge.

	Each
18-24 inches, B&B	\$2.00
24-30 inches B&B	3.00

EVERGREENS

FLORIDA JASMINE

Bright green foliage, masses of yellow flowers. Blooms from May to November. Can be trimmed to give an informal, flowering effect, and is ideal for foundation or border plantings. Usually grows about 3 feet high with the same spread.

	Each
18-24 inches	\$2.00
24-30 inches	3.00

Florida Jasmine

PYRACANTHA LALANDI

Fast becoming one of the most popular of the larger growing evergreens, because of its handsome, upright branches and glowing clusters of orange berries all winter. Most attractive in spring when fairly loaded with masses of tiny white flowers. Makes a fine hedge plant when pruned or can be trained over arbors. You have probably noticed thousands of these plants on the highways of Texas.

	Each
2-3 feet, gallon cans	\$2.00
3-4 feet, 4-gallon cans	3.50

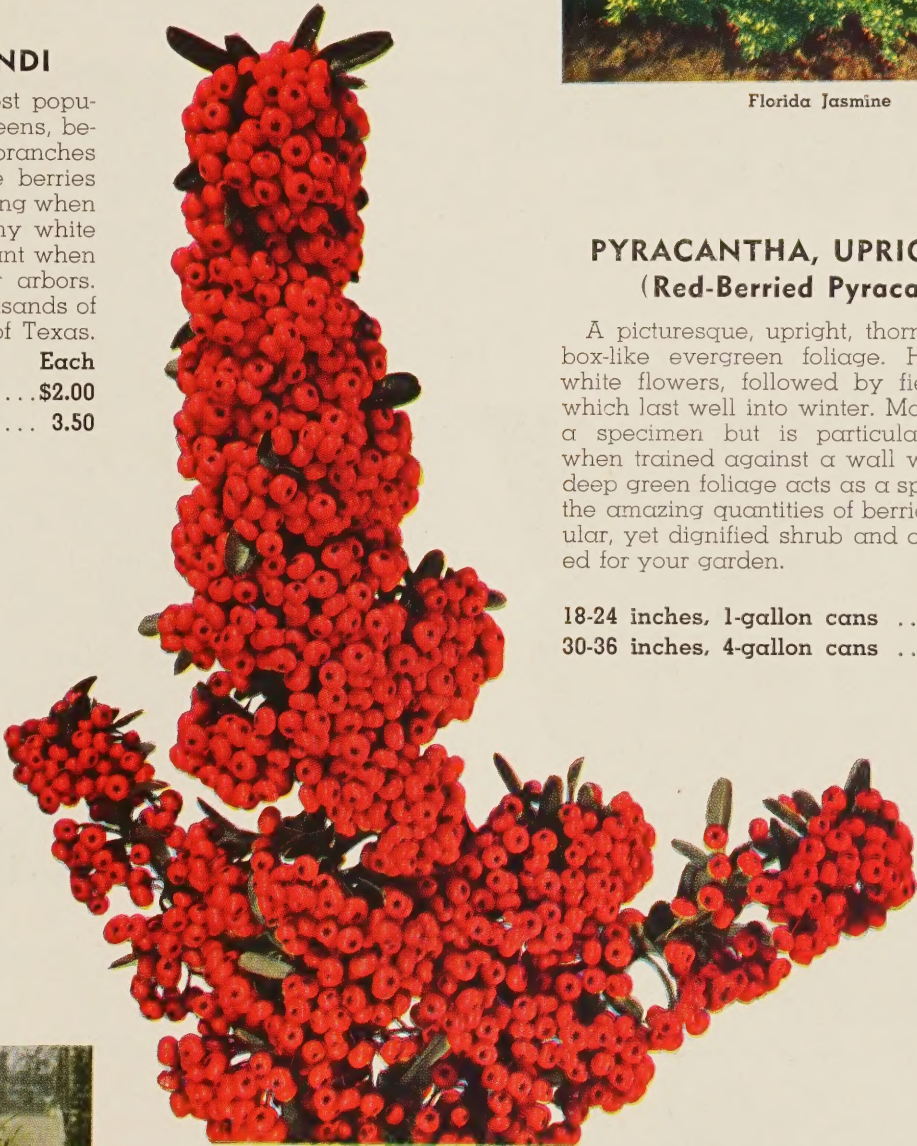

NANDINA Heavenly Bamboo

One of the most interesting plants that we grow and is extremely decorative the entire year. In the spring and autumn the large compound leaves are tinged with red; in early summer panicles of white flowers are produced; and in the winter, the crowning glory, terminal spikes of large bright red berries are retained until the following spring. Hardy over the entire SOUTHWEST.

	Each
12-18 inches, single cane .	\$1.50
18-24 inches	2.50
24-30 inches	3.00

Nandina

Pyracantha, Red

PYRACANTHA, UPRIGHT RED (Red-Berried Pyracantha)

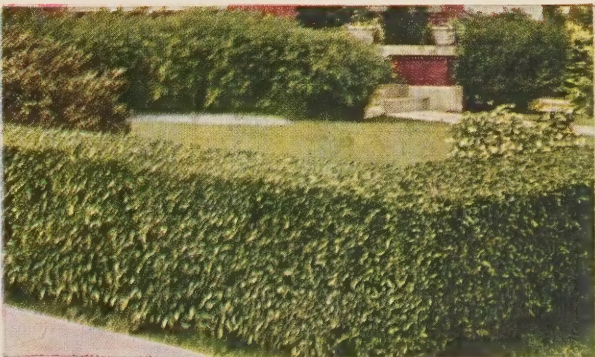

A picturesque, upright, thorny shrub with box-like evergreen foliage. Has attractive white flowers, followed by fiery red fruits which last well into winter. May be used as a specimen but is particularly attractive when trained against a wall where the rich deep green foliage acts as a splendid foil for the amazing quantities of berries. A spectacular, yet dignified shrub and one to be prized for your garden.

	Each
18-24 inches, 1-gallon cans	\$2.00
30-36 inches, 4-gallon cans	3.50

AMUR RIVER PRIVET (SOUTH)

The best hedge plant for the South and Southwest. Its rapid and graceful growth, with its small, bright green foliage and its ability to stand constant pruning make it one of the most desirable plants for hedges.

	10	100
18-24 inches ...	\$2.50	\$20.00

Amur Privet South

CAMELLIAS

We are offering Camellias in Varieties that appear to be stronger for this area

Chandleri Elegans

CHANDLERI ELEGANS. One of the largest Peony-flowering Camellias. Cherry-red, with white variegations. Some are thick Peony flowers with 500 petals, while others are loose Peony form with yellow stamens.

Prince Albert

CHEERFUL. Double, medium size, Rose type. Deep pink. Blooms very early. Upright grower.

DOUBLE PINK. Exquisite Peony form; soft rose-pink. Tender habit; mid-season.

GLOIRE DE NANTES (Leana Superba). Large, semi-double, cerise bloom, with center petals often twisting. Extremely large, dark green leaves, and bold large flowers make this one of the most attractive on bush.

LILY. Attractive, double, white flowers of medium size. Rapid growing, compact and symmetrical.

PINK PERFECTION. Very double, clear shell-pink flowers of dainty form, liked by many. Plants start blooming when very young, coming early in the season and continuing in profusion for a long time.

POPE PIUS. Large, full double; flame-red. Vigorous, upright, midseason.

PRINCE ALBERT. This well known favorite is a good compact grower and a profuse bloomer. The flowers are full double, of medium size, rose-red in color, and produced mid-season to late. Very dependable.

PROF. C. S. SARGENT. Very thick, Peony-form, solid crimson blooms of medium size.

PURITY. Very double, symmetrical, pure white, star-shaped flowers, occasionally with stamens. One of the best of all whites. Upright grower.

CAMELLIAS FOR EXOTIC BLOOMS

Varieties best suited to this area.

CAMELLIAS (C. japonica). Bloom from early winter until late spring. Lovely flowers of delicate texture—waxy, perfectly formed and beautifully colored. Foliage is attractive glossy green. May be planted in spring or fall. Thrive best in semi-shaded locations. Prefer deep, rich soil—somewhat acid. Popular as garden borders alone or with other evergreens. Useful as foundation plantings. For exotic blooms, reminiscent of the Old South, plant this collection of Camellias.

Purity

Pink Perfection (above)

CAMELLIA PRICES:

	Each
15-18 inches	\$ 5.00
18-24 inches	7.50
24-30 inches	10.00

Everblooming Baby Roses

(Polyanthas)

A class of Roses (Polyantha) called "Baby Roses" because of their small, dainty blooms. Most varieties bloom continuously and profusely; it is not uncommon for the plants to be completely covered with color, resembling a living bouquet. They bloom almost continuously from early spring to late fall. Plant them for massing in beds, for edging or for low hedges.

GOLDEN SALMON. Bright orange-salmon flowers in huge clusters. Blooms all through the season. A novel Rose and very popular. **\$1.00 each; \$10.00 per doz.**

CHATILLON. One of the very best dwarf pink Roses. Large heads of flowers all season. An outstanding Rose for any garden. **\$1.00 each; \$10.00 per doz.**

IDEAL. Velvety crimson clusters of fragrant flowers, most popular red; strong grower. Lasts well when cut. Beautiful dark green glossy foliage. Blooms first and last in season. **\$1.00 each; \$10.00 per doz.**

BABY IDEAL. A deep garnet-blood-red Polyantha. Blooms very profusely in large clusters, on a bushy, compact plant 18 to 24 inches in height, with rich, dark green foliage. **\$1.00 each; \$10.00 per doz.**

CECILE BRUNNER. Multi-color. **\$1.00 each; \$10.00 per doz.**

Polyantha Rose, Baby Ideal

AZALEAS

CORALBELLS. Compact grower with small, round, glossy leaves. The dainty, bell-shaped pink flowers are not large but it is a very profuse bloomer.

PRIDE OF MOBILE. By far the best Indica Azalea. A fast grower with foliage a shade lighter than that of Formosa. Very hardy and a good bloomer, forming watermelon-pink blossoms in masses that completely cover the plant.

HINODEGIRL. Slow, compact grower, but its fiery red flowers will literally smother the entire plant, even when they are very small, making it one of the most desirable pot plants.

FORMOSA. One of the finest in its color class. Large, rose-purple flowers. Strong growing. Has good foliage, blooms early.

SNOW. True to name with pure white clusters. Compact grower.

Azalea Hinodegiri

Azaleas with Sheared Youpon in Background

Cultural Directions on Azaleas

By nature, Azaleas are woodland plants. They love partial shade and acid soil. The roots, which are near the surface, should be kept cool and damp, and never allowed to dry out. For this reason, a moist, porous soil, fairly rich in leaf mold, humus or peat is ideal. They dislike lime or limestone soil and success will be more certain on such soils if they are planted in woods earth or peat moss. Oak leaves are ideal for covering the ground beneath them. Adding aluminum sulphate, 1 to 2 lbs. per square yard, or peat moss to the soil, helps to create the acid condition required by these plants.

You will do well to use the same soil conditioner on Camellias as you do on Azaleas. A good humus, porous soil for both is desired.

Azalea Prices:

	Each
8-10 inches	\$1.50
10-12 inches	2.00
12-18 inches	2.50

Climbing Roses

No. 1 Grade

Most of the Roses in this class are climbing forms of the familiar bush Roses of the same name and classified as Teas and Hybrid Teas. These Roses bloom at intervals during the whole season, which is a distinct advantage. For the Southwest and sections where the winters are reasonably mild, they are highly recommended. After they are established they give satisfactory results. The flowers come from spurs on old wood, therefore they should not be pruned.

CLIMBING PEACE

(Plant Patent No. 932)

Climbing Peace, the complement to the All-Time, All-America Peace Rose. This new Climbing sport originated in our own fields in Tyler, Texas and has the same sturdy qualities of the bush Rose. The full bud is deep yellow with the edges of the petals picoté cerise. It slowly opens to a glorious 5-inch bloom with shades of canary-yellow, pale gold, cream, pearly white, and apple blossom. **\$2.00 each.**

(See Picture of Peace Rose on Page 2)

CLIMBING K. A. VICTORIA. Soft pearly white shading to light lemon in center. Everblooming.

CLIMBING PINK RADIANCE. A beautiful two-toned, vivid pink, fragrant, monthly bloomer.

CLIMBING ETOILE DE HOLLANDE. A very fine large, everblooming, red climber with the same blossom as the famous bush Etoile de Hollande, producing many large blossoms on long stems.

PAUL'S SCARLET. Semi-double flowers in large clusters, flaming scarlet with a crimson shade. None better. This is an excellent Pillar Rose.

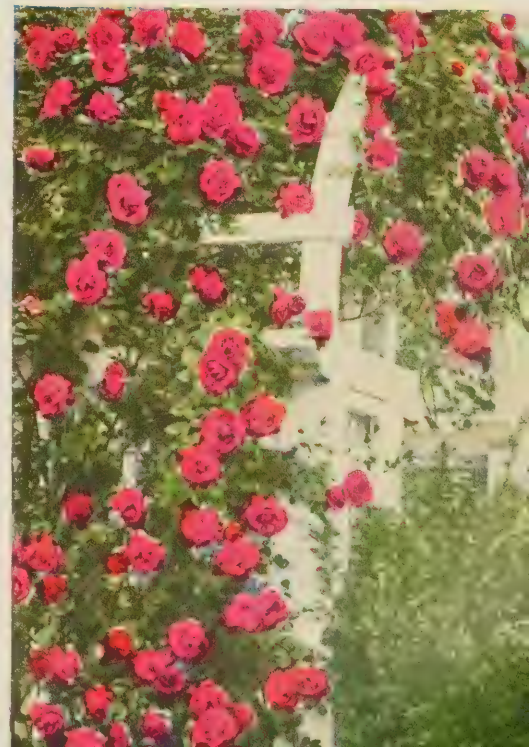

CLIMBING TALISMAN. Climbing sport of the familiar Talisman. An excellent bloomer. No other multi-colored Rose is as popular as Talisman.

CLIMBING RED RADIANCE. Sport of Red Radiance with the flower like the parent; excellent climber. One of the most popular and a good bloomer.

CLIMBING COLUMBIA. Sport of bush Columbia. Peach-blow-pink flowers like its parent. Nearly thornless. One of the best varieties.

	Each	Doz.
Heavy, field-grown	\$1.00	\$10.00

Climbing Rose. Paul's Scarlet

SHRUBS *for the* GARDEN

ALTHEA

We are offering four named varieties that are "Best for the Southwest."

Altheas bloom from May to September, producing masses of flowers throughout the summer months. Height about 10 feet.

ANEMONAEFLORUS. Semi-double, bright rose.

AMPLISSIMA. Red, very double, flowers resemble Carnations.

LADY STANLEY. Semi-double, light pink.

VIOLET-CLAIRE. Large, clear purple, semi-double.

(We offer only budded varieties, not to be confused with seedling-grown plants.)

Each

2-3 feet\$1.00

3-4 feet 1.50

Butterfly Bush

Althea

HAWAIIAN HIBISCUS (Peachblow)

Plant some of these fine specimens grown in 3-inch pots or gallon cans, for beauty in your garden and to carry in your home for arrangements. Has large double, pink blooms of semi-Peony form, ruffled petals turning to darker pink toward center, showing bright yellow stamen breaking through bloom. Flowers measure as much as 5 inches in diameter. Short stems that are easy to take from plants without cutting foliage. These flowers can be used in floating bowls, corsages, and just about any compact arrangement you desire. Plants have large, lustrous, green leaves to back up the large flowers. Plants often grow to 6 feet in height. They have a rapid habit of growth, which makes them too tender to stand freezing temperature. (Hibiscus Peachblow) will grow in about any location but will need storing in winter to protect from freezing. These plants will give lots of bloom the first year. **Spring delivery only.**

	Each	Doz.
3-inch pots	\$0.60	\$ 6.00
Gal. cans	1.00	10.00

DWARF CARNATION-FLOWERING POMEGRANATE

A very fine plant because of its bright waxy green foliage, its orange-scarlet blossoms in spring; and its pretty ruby colored fruits in late summer and autumn. Extremely hardy and drought resistant. One of the few fine plants that will grow and thrive where root rot infests the soil. Because of its rather dwarf growing nature (4 ft.) it is excellent for planting around the foundation of a house and for giving color in front of other shrubs.

	Each
12-18 inches	\$1.00

HARDY LANTANA

A rapid, low growing perennial-like shrub, producing small heads of orange and yellow flowers the entire season. Very desirable for giving color in front of tall shrubs. Thrives in any soil. Orchid and yellow variety equally as continuous a bloomer. Flowers are a combination of orchid and yellow colors. Foliage is prickly and aromatic.

	Each
Heavy clumps	\$0.75

SALVIA LEUCANTHA

An upright, fall blooming, hardy perennial. Large purple spikes of flowers borne on slender, willowy stems. It makes a very interesting plant for late fall blooming. Should be planted in spring only and is available in small plants in 3-inch pots.

	Each	Doz
Small, 3-inch pot plants	\$0.60	\$6.00

CRAPE MYRTLE

By far the best known, most popular and finest flower-shrub in the Southwest. Blooms freely from June to October. The soft, fluffy flowers of crinkled crepe are borne in dense heads. Watermelon-red is the most popular color.

Don't worry if they are slow to start growing after planting. They are sometimes slow starters.

	Each
2-3 feet	\$0.75
3-4 feet	1.00

Crape Myrtle

Plants of the SOUTHWEST

BUTTERFLY BUSH

(Buddleia, Ile de France)

A new, improved form of the old favorite. Long, graceful spikes of dark violet-purple give color from May until frost. It is very fine as a cut flower. It is well named as it attracts butterflies and humming birds throughout the blooming season.

Each

18-24 inches\$0.50

2-3 feet75

Bush Honeysuckle

RED WING

From Far Off South America Comes This Exotic Little Plant

From South America, the land of color, comes one of the most colorful shrubs of recent years. Yellow blossoms in sprays with red seed pods that cling to the stem give a profusion of color the entire summer, regardless of the heat and dry weather. Ideal for use in landscape work where a small flowering shrub is required. Can be trimmed often without affecting its beauty. Fine for cut flowers, keeping several days after cut. Not hardy north of Lubbock.

Each

2-3 feet\$1.00

ALMOND, PINK FLOWERING

A beautiful small shrub, bearing an abundance of small, double Rose-like flowers, closely set upon twigs, before the leaves appear in early spring.

Each

18-24 inches\$1.00

Flowering Almond

BUSH HONEYSUCKLE

WHITE. One of our earliest blooming plants, blooming in February and March.

PINK. Flowers borne in clusters in March and April.

Each

3-4 feet 1.00

WHEN AND HOW TO PRUNE YOUR SHRUBS

Much mis-information has been given and is continually given as to the best method and time for pruning Flowering Shrubs. Many people make the mistake of pruning just before shrubs are to bloom and usually results in losing the blooms for an entire year. The following rule is a good one to use: **PRUNE SPRING BLOOMING SHRUBS AFTER THEY HAVE BLOOMED IN THE SPRING AND SUMMER AND FALL BLOOMING SHRUBS IN THE WINTER TIME.**

Most Flowering Shrubs can stand a good amount of pruning and usually produce better blooms if they are pruned every three or four years. There is no set rule as to how far to trim back Flowering Shrubs but the lower growing varieties do better if trimmed fairly close to the ground. The taller growing varieties such as Crape Myrtle, Althea, Pomegranate, Bush Honeysuckle, etc., can be trimmed back to conform with the other shrubs in your planting.

Flowering

FLOWERING QUINCE

Masses of bright scarlet flowers in early spring. Our plants are budded plants grown from flowering wood. One of the first plants to bloom in the spring.

	Each
18-24 inches	\$0.75
2- 3 feet	1.00

ENGLISH IVY

Beautiful dark green evergreen leaf. Clings to masonry if used on North or East side where protected from hot sun. Where Evergreen cover is desired, English Ivy is your best plant.

Each

Flowering Quince

FORSYTHIA (Golden Bell)

Rarely do we find a yellow flower that attains such perfection in glowing color as the early blooming flowers of Forsythia that mass in great profusion during April. After that, the graceful swaying limbs support dense green leaves that suggest a friendly welcome to the lawn or shady part of the landscape.

	Each
2-3 feet	\$0.75
3-4 feet	1.25

Forsythia

Deutzia

DEUTZIA

PRIDE OF ROCHESTER. Blooms in May, large double flowers.

	Each
2-3 feet	\$0.75

PERSIAN LILAC

Now here is a Lilac that will bloom every year and sometimes twice a year, in the spring and again in the fall. Large panicles of purple blossoms make a striking effect when in bloom. Very fragrant, and make good cut flowers for spring bouquets.

	Each
2-3 feet	\$0.75

WEIGELA

Eva Rathke

A rich red colored Weigela with good, compact habit of growth, freedom of bloom and lovely flowers. One of the many flowering shrubs that all gardeners love.

Rosea

Bushy, spreading plant with beautiful trumpet-shaped blooms of light rose.

	Each
2-3 feet	\$0.75
3-4 feet	1.25

Persian Lilac

Shrubs

SNOWBALL

An old favorite. Tall growing; large coarse textured foliage; showy white flowers in large heads, making a complete "snowball."

	Each
18-24 inches	\$1.00
2- 3 feet	1.50

Snowball

MOCK ORANGE

This beautiful flowering shrub blooms heaviest in May and June but Orange blossoms can be seen almost any day during the summer. It is Mother Nature's perfume of the garden.

	Each
2-3 feet	\$0.75

Mock Orange

Salt Cedar—Tamarix

SALT CEDAR - Tamarix

A very rapid growing shrub or small tree, which is excellent for heavy plantings or hiding unsightly structures. Grows well on any type of soil. Bears numerous spikes of lavender colored flowers at the ends of the branches over a long season. Has Sage-like aroma. There are several good varieties, but we think "Tamarix Hispidula Aestivalis" is the best for all-around purposes.

	Each
18-24 inches	\$0.75
2- 3 feet	1.00

Your neighbors might like to see this catalog, would appreciate your sharing it with them.

SPIREA

There are several varieties of Spireas. We think the best are:

PRUNIFOLIA. Small white, double blossoms. Shiny foliage. One of the best Spireas for cut flowers. Make a fine bouquet mixed with Flowering Quince, Golden Bell, and other spring flowers.

REEVESIANA. Double blooming; upright growing; white.

VAN HOUTTEI. Known as Bridal Wreath. Low growing, pendulous branches, effective when covered with single white blossoms in the early spring.

	Each
2-3 feet	\$0.75
3-4 feet	1.00

Spirea Van Houttei

Spirea Prunifolia

For Enjoyment and Beauty Plant

Scopulorum Juniper

BLUE COLUMNAR JUNIPER

Slender, pyramidal; grows symmetrical and narrow, with blue-gray, prickly foliage. Ultimate height about 18 feet.

Each	
3-4 feet	\$ 7.50
4-5 feet	10.00

BLUE VIRGINIANA JUNIPER

Silvery blue color, silver berries, grows quite rapidly, eventually reaching 20 feet or more. Easily trimmed.

Each	
3-4 feet	\$ 7.50
4-5 feet	10.00

SCOPULORUM JUNIPERS

There are several types of Scopulorum Juniper which are native in the Rocky Mountains. The best types are grown from grafts and we have listed below three of these types:

HILL'S SILVER JUNIPER. The growth is compact and symmetrical and of a bright, light bluish color. One of the leading ornamental trees throughout the Southwest.

MOONLIGHT JUNIPER. This tree has none of the typical needlelike foliage of Juniperus Scopulorum, but runs to the whipcord foliage. This, combined with its extremely light, frosty blue color, gives it peculiar and distinct characteristics.

CHANDLER'S SILVER JUNIPER. The Chandler's Silver Juniper is one of the popular varieties of Scopulorum which has gained wide acceptance throughout the trade, particularly in the western and southwestern territory. It is a compact, upright grower with attractive, light blue foliage.

Each	
3-4 feet	\$ 7.50
4-5 feet	10.00

SPINY GREEK JUNIPER

Its growth is rather broad, tapering to a pointed terminal top. In this locality trees seldom reach more than four or five feet high with a spread of 2½ to 3 feet. It grows slowly and is, therefore, of great value in foundation plantings and rock gardens.

Each	
12-18 inch	\$2.00
18-24 inch	3.00
24-30 inch	4.00

TAMARISCIFOLIA JUNIPER

A small, compact growing, refined, spreading Juniper, with blue-gray foliage. Ideal for formal or mass bed plantings where a low-growing effect is needed.

Each	
12-18 inch	\$4.00
18-24 inch	5.00

SAVIN JUNIPER

Same price as Tamariscifolia Juniper.

RED CEDAR

One of the best known American evergreens. Ideal for planting in almost any growing condition. Light green in the summer, turning to purplish red in the fall and winter. Can be sheared into a formal specimen, grown loose for mass effect, or trimmed to a standard formal tree effect.

Each	
3-4 feet	\$5.00
4-5 feet	7.50

WORTHIANA ITALIAN CYPRESS

Very superior strain of symmetrical, upright growth, and much harder than other Cypresses. The parent tree on our grounds is twenty years old and has never been injured by cold when all other specimens were either killed outright or severely damaged by the severe cold spells we have had every four or five years. Young plants propagated from this stock were uninjured in the field while other stock was killed. Every tree is handsome and uniform in its growth. Maximum height 20 feet.

Each	
2-3 feet	\$2.50
3-4 feet	4.00
4-5 feet	5.00

DUNDEE JUNIPER

One of the nicest types of Juniper that we grow. Grows to a height of from 12 to 15 feet in the Southwest. The summer color is grayish green, the winter color is a purplish plum which develops after the frost in the fall. It thrives in all sections of the country and is rapidly becoming a great favorite with planters everywhere. It can be trimmed and maintained in a small size, but under normal conditions it grows in a fairly broad and compact pyramidal shape.

Each	
3-4 feet	\$ 7.50
4-5 feet	10.00

PFITZER'S JUNIPER

The handsomest of the Chinese Juniper varieties, the Pfitzer, which grows in the form of a low, broad pyramid, is the most satisfactory of all Junipers in this climate. Can be used in shade or in open buildings; in fact, will grow under almost any conditions under which any other evergreen will grow.

Each	
15-18 inch	\$3.00
18-24 inch	4.00
24-30 inch	6.00

Worthiana Italian Cypress

Pfitzer's Juniper

Throughout All the Year EVERGREENS

ARIZONA CYPRESS

One of the fastest growing, drought-resistant varieties that we have. Extremely blue in color, fine textured foliage. This plant attains a growth of about 18 feet and about 10 feet in width. Should be used as specimen plants and not planted too close to buildings.

	Each
12-18 inches, gallon cans	\$1.50
18-24 inches, gallon cans	2.00

JUNIPER HETZI GLAUCA

Very similar to Pfitzer Juniper only has a very silvery, gray foliage. A favorite in spreading Junipers.

	Each
18-24 inches	\$4.00
24-30 inches	6.00

BONITA UPRIGHT ARBOR-VITAE

One of the best of the newer types of compact, pyramidal form of Chinese Arbor-Vitae. Makes a dark green, compact growth, identical to the Bonita except in habit.

	Each
18-24 inches	\$3.50
24-30 inches	5.00

RAMSEY'S HYBRID ARBOR-VITAE

Is an improved strain. This improved old variety is sturdy, with a heavy, more compact, dark green, feathery textured foliage. One of the hardy columnar varieties.

	Each
2-3 feet	\$2.50
3-4 feet	5.00

ROSEDALE ARBOR-VITAE

Dwarf, compact type Arbor-Vitae. Light green, feathery foliage.

	Each
18-24 inches	\$2.00
24-30 inches	3.00
30-36 inches	4.00

BERCKMANN'S GOLDEN ARBOR-VITAE

One of the nicest of the lower growing compact evergreens. The golden yellow of the foliage makes a most pleasing contrast to the deep green of other evergreens. Because of its extreme hardness (having stood 15 degrees below zero without damage) it may be used in almost any location. The dwarf, compact habit of growth makes it ideal for small gardens, window boxes, vases and cemetery plantings.

	Each
18-24 inches	\$3.00
24-30 inches	4.00

Berckmann's Golden Arbor-Vitae

BAKER'S ARBOR-VITAE

We are proud of this dark green Arbor-Vitae which bears our name, and which we developed and introduced over 20 years ago. It is by far the best known and most widely used of any evergreen in plantings. Ultimate height about 12 feet.

	Each
2-3 feet	\$2.50
3-4 feet	4.00
4-5 feet	5.00

BONITA ARBOR-VITAE

Bonita being the Spanish name for "pretty," this little plant is indeed well named. Low, round growing, dark green; ideal for formal plantings, window boxes, urns, etc.

	Each
18-24 inch	\$3.00
24-30 inch	4.00
30-36 inch	5.00

EXCELSA ARBOR-VITAE

A fast, compact grower, darker in color than Baker, and a little wider at the bottom. As pretty as any of the Chinese types and hardier. Grown successfully in northern states. Has withstood 40° below zero in New Mexico.

	Each
30-36 inch	\$3.00
3-4 feet	4.00

CANNARTI RED CEDAR

This horticultural variety of the Red Cedar has long been one of the leading favorites. It has deep, rich green color and runs largely to the whipcord foliage rather than the needle formation. If left untrimmed, the growth is rather open and graceful, but by shearing, specimens may be produced to suit the needs of the planter. The ultimate growth is up to 20 feet, but by trimming may be kept smaller. In diameter trees may be two to four feet at the base. It has unusually bluish and powdery berries which occur in some trees in large clusters and are most attractive.

	Each
3-4 feet	\$ 7.50
4-5 feet	10.00

Cannarti Red Cedar

Notice the large, firm balls of growing soil dug with each plant. This method of handling assures the evergreen a good chance to live when transplanted.

Shade Trees

Mimosa (Chinese Silk Tree)

MIMOSA

(Silk Tree)

A low, flat-headed tree with Acacia-like foliage and feathery, fragrant pink blossoms in summer. Will grow in practically all types of soil. Not hardy north of Kansas City, Missouri.

	Each
4-5 feet	\$2.00
5-6 feet	3.00
6-8 feet	4.00

SYCAMORE

(Platanus Occidentalis)

Very easily grown, giving quick shade and making a handsome tree, with well formed head, and interesting white bark.

	Each
8-10 feet	\$3.00
10-12 feet	5.00

AMERICAN ELM

(Ulmus Americana)

An excellent native tree, with a broad, spreading head which makes a splendid shade tree. It is long lived and hardy.

	Each
6-8 feet	\$2.50
8-10 feet	3.50

American Elm

CHINESE ELM

(Ulmus Pumila)

A remarkable tree because of its great rapidity in growth, bright fresh looking foliage and compact shape. Stands drought or cold, and retains its foliage until quite late in autumn.

	Each
6-8 feet	\$2.00
8-10 feet	3.00
1 1/2-2 inch caliper	5.00

WESTERN GREEN ASH

A rapid growing tree desirable for planting in the arid section of the Southwest, though it will also thrive on the coast and in other sections. Will flourish in alkaline soils and withstands drought well.

	Each
6-8 feet	\$2.50
8-10 feet	3.50

LOMBARDY POPLAR

(Populus Nigra Italica)

Tall, column-shaped tree, which is very effective used as a background or accent.

	Each
6-8 feet	\$1.50
8-10 feet	2.00

PIN OAK

Tall growing, stately, almost evergreen in the Southwest. Used extensively in South and East Texas, but thrives over the entire Southwest. Bright scarlet foliage in fall.

	Each
1 1/2-2 inch caliper	\$6.00

TREE FRUITS *for*

Plant a home orchard. Nothing could be better than going into your own back yard and gathering fruit of your choice for the occasion. Plan a continuous fruit crop. Plan for good fruit. Select from varieties listed on these pages and you can't go wrong.

WINTER APPLES

↘ **CRIMSON WINESAP.** One of the best of the old Winesap varieties. Bears well and will keep throughout the fall and winter. Fruit is medium in size, medium red, juicy and of fine flavor.

↘ **DOUBLE RED DELICIOUS.** Considered as one of the finest Apples on the market today. It bears young, keeps longer and the fruit colors up several weeks earlier than the common Red Delicious. The fruit is large, solid red and has a delicious flavor that is unexcelled by any other Apple. Fine for home or commercial use.

↘ **DOUBLE RED JONATHAN.** Everyone knows and likes this fine red Apple. Fruit is a dark red, crisp and tender. Fine for cooking or the market.

↘ **GRIMES GOLDEN.** Medium to large, bright yellow, with pink cheeks; flesh fine grained, juicy, with a very pleasing spicy flavor. For pies, sauce and dumplings, is excellent. One of the best quality eating Apples. Keeps in storage until January.

↘ **ROME BEAUTY.** Fall bearing. Keep well.

↘ **STAYMAN WINESAP.** Medium size, dark red, juicy, mild. A favorite late winter Apple and a leading commercial variety on all markets, as well as a very popular home Apple in the West.

↘ **YELLOW DELICIOUS.** Bears young and heavily; large, golden in color and a very delicious flavor. Ripens in October and will keep until spring.

APPLE PRICES:

	Each
3-4 feet	\$1.25
4-6 feet	1.50
Heavy Specimen trees, ¾-inch diameter, \$2.00 each	

APRICOTS

↘ **CLUSTER.** A very productive variety. Fruit medium in size, firm and very delicious. Bears early.

↘ **MOORPARK.** Large, freestone, productive. Bears in July. Yellow and brown with dark specks. Good for canning or drying.

APRICOT PRICES:

	Each
3-4 feet	\$1.50
4-5 feet	2.00

PEARS

↘ **DOUGLAS.** Bears in October. Produces young. Medium sized golden color; firm, melon fruit. Blight resistant.

↘ **GARBER.** Large yellow, red blush on cheek. Good keeper and shipper. Bears in August.

↘ **KIEFFER.** Large, golden yellow, often blushed in the sun; juicy and melting. One of the best for canning and preserving.

PEAR PRICES:

	Each
3-4 feet	\$1.50
4-6 feet	2.00

PLUMS

↘ **GOLD.** July. Hybrid variety. Fruit almost transparent, golden yellow, desirable as market sort.

↘ **OPATA.** June. Medium. Purple-red splashed with green. Clingstone. Gorgeous in bloom—bears first year after planting. Sweet and juicy.

↘ **SAPA.** July. Somewhat dwarfish, thrifty. Fruit large, dark purple with greenish splotches; flesh rich, dark purple-red, of rich flavor, small pit.

↘ **SIX WEEKS.** May. Earliest; large, brilliant red; flesh pink; stone small. Tree vigorous; grows well in all locations.

↘ **WANETA.** Bears very young. Red colored, delicious fruit. Ripens in July. Prolific.

↘ **WICKSON.** July. Large, heart-shaped, bright red with heavy bloom; flesh yellow.

PLUM PRICES:

	Each
3-4 feet	\$1.50
4-6 feet	2.00

TEXAS EVERBEARING FIGS

↘ **BROWN TURKEY.** A very large, bluish purple fruit. Bears prolifically from July through September.

↘ **MAGNOLIA.** Large, pale green or white; shape varies from ordinary Fig in that it is short and flat. Always bears, first year, and, if frozen, will bear on the young wood of the first year. Commonly known as "Neverfail."

FIG PRICES:

	Each

the Southwestern Planter

CHERRIES

↘ **EARLY RICHMOND.** The first Cherry to get ripe, ripening soon after school is out. They taste so good and are ideal for making fresh Cherry pie. The large, bright red fruit is juicy and delicious. Bears heavily and starts bearing very young.

↘ **MONTMORENCY.** The most widely planted Cherry because it does well everywhere. A sure bearer, ripening about 10 days later than the Early Richmond. Best of all for canning.

	Each
3-4 feet	\$1.50
4-6 feet	2.00

Your neighbors might like to see this catalog. Would appreciate your sharing it with them.

PECANS

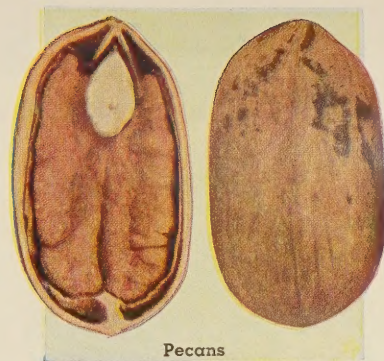

Plant Pecans for shade as well as for nuts. We are listing the three varieties that in our opinion are "Best for the Southwest."

	Each
4-5 feet	\$4.00
5-6 feet	5.00

↘ **BURKETT.** The Burkett nut is large, almost perfectly round, thin, soft shell, plump kernel and excellent flavor. Kernels release easily, coming out in whole halves. Early and regular bearer. Healthy and vigorous and one of the finer varieties for East and West Texas.

↘ **SUCCESS.** A fine variety. Large, oblong, thin shell. Has good cracking qualities as the partitions are thin and the full, plump, yellow kernels are of a good flavor and very delicious. Immune to disease to which most varieties are susceptible.

↘ **WESTERN SCHLEY.** The standard of excellence among Pecans. Very high quality flavor; long, slender, thin shell. Ripens early.

↘ **BELLE OF GEORGIA.** The fruit is uniformly large and showy, white with red cheeks; flesh white, firm and very delicious. Produces heavily in mid-July.

↘ **EARLY WHEELER.** High quality early Peach, ripen about May 30th. Does best in North and West Texas and New Mexico.

↘ **ELBERTA.** Everyone knows this universal variety. This large, yellow, delicious Peach fills millions of fruit jars every year. Early July.

↘ **FRANK.** A very fine, large, yellow, delicious clingstone Peach. One of the best varieties for home and commercial growing. Mid-July.

↘ **HALE-HAVEN.** Ripens early July, just before Elberta. Yellow freestone, firm flesh; consistent bearer.

↘ **INDIAN CLING.** The old-fashioned Indian Peach. Medium in size and extra delicious; flesh red and one of the best clingstone varieties.

↘ **J. H. HALE.** One of the oldest and best Peaches on the market today. The very large, golden yellow fruit begins to blush with a faint touch of red as it begins to ripen, and with its fuzzless skin, it is one of the most desirable for eating purposes and is one of the most widely used varieties for canning. The flesh is yellow, solid, tender and delicious. Ripens in mid-July and in time to get the best market prices. Be sure to plant several of these at these attractive prices.

↘ **MAMIE ROSS.** A very large oval Peach, white and with a red cheek; its firmness and tough skin make it one of the best early Peaches for the market. The flavor is rich and extra delicious. Late June.

↘ **MAYFLOWER.** One of the first to ripen. Medium in size, practically red all over; flesh firm and of good flavor. Bears early when fruit is welcome in any home. Early June.

Elberta Peach

Mamie Ross Peach

Hale-Haven Peach

BERRIES and GRAPES

STRAWBERRIES

➤ STREAMLINER

Sensational Everbearer For the South

The largest Strawberry grown. Some as large as hen eggs. Streamliners planted in Fort Worth last February started bearing in March and were picked all summer and through Christmas. A Fort Worth grower says, "Streamliner produces more of the best Strawberries than any we have tried in seventeen years. They continued to bear through 25 degrees of weather." Mulch the ground heavily with straw or sawdust to keep heavy berries off the ground. Find a place in your planting for this huge, fancy, rich-flavored Strawberry. **25 plants \$1.50; 50 plants \$2.75; 100 plants \$5.00, postpaid.**

➤ Everbearing GEM

This giant Strawberry is fast becoming the most popular everbearing variety. Almost every place Strawberries are grown, Gem is proving a grand success. The large, firm, bright red berries are of very high quality. They are even better than this picture, and what a flavor—nothing like a heaping bowl of delicious Strawberries for breakfast, or eating fresh out of your garden, in the evening after work. Gem will start bearing 60 to 80 days after planting, and will produce lots of good eating until frost. **25 for \$1.25; 50 for \$2.00; 100 for \$3.50, postpaid.**

GRAPES

2-year vines, 50c each; \$5.00 per doz.

➤ **BIG EXTRA.** Extra large bunch; berries black, of fine quality. A Post-Oak hybrid variety. Hardy and good bearer. June.

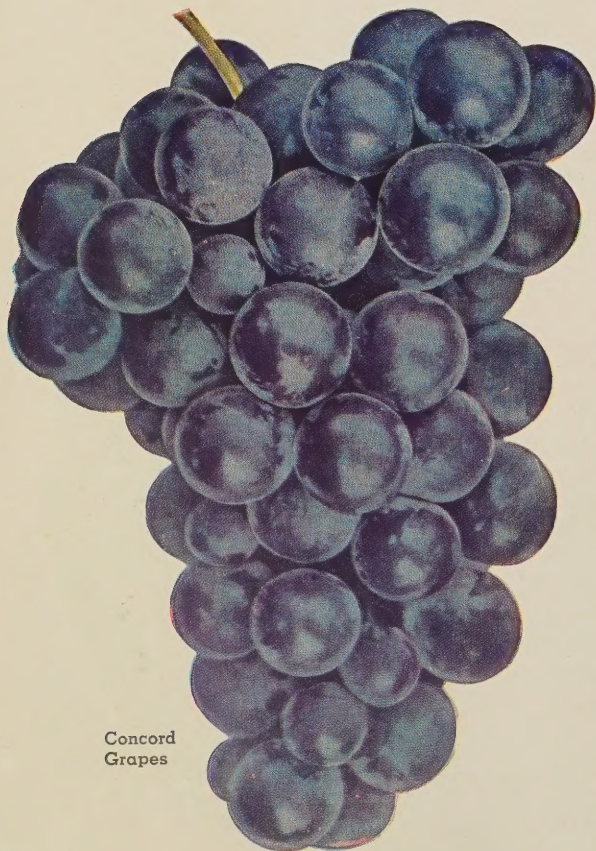

➤ **CARMAN.** One of the best varieties for the South. Dark red and of fine quality. Ripens in July.

➤ **CONCORD.** The most widely known and the most popular Grape. Large, compact clusters of large black fruit. Delicious, sweet and very tender. Begins to ripen about July 20th and continues for about three weeks.

➤ **DELAWARE.** Small, compact clusters of bright red berries. Fruit is juicy and very sweet.

➤ **MOORE'S EARLY.** Very large, early black of fine texture and quality, fine for market or home use. Hardy and prolific. Ripens in June.

➤ **NIAGARA.** Most popular of the white Grapes because the large fruit has such a delightful flavor. Heavy bearer and excellent for arbors.

Concord
Grapes

➤ BOYSENBERRY

The Boysenberry is a cross of the Blackberry, Raspberry and Loganberry, and is far more vigorous than any of its parents. It is immense in size and when you taste it, you will agree that in flavor it stands supreme. It is impossible to describe its delicious flavor. It is almost seedless, firm, and is produced in large clusters on long stems that stand away from the canes. Delicious when eaten fresh or with cream, and is ideal for canned sauce, jam, jelly or preserves, in pies, tarts and shortcakes. Its natural tendency is to trail on the ground, but can be trained on fence or wires.

Doz. \$ 2.00

10 lbs.	1.40

ARCTIC PEAT MOSS

Arctic Peat Moss—soil conditioner, mulching material and rooting medium. It absorbs from 12 to 15 times its own dry weight in water. Arctic Peat is Canadian Peat, carefully mined, screened and graded.

Arctic Peat Moss on the lawn, in the garden, in the flower bed or around the shrubs holds the moisture supply in the soil. Mulching with Arctic Peat Moss prevents roots from drying out in the summer, and in the winter roots are protected from alternate thaws and freezes. One bale covers approximately 300 sq. ft. 1 inch deep. Moisture content varies so shipping weights are approximate.

ORTHO ROSE DUST

One package pest control for Roses and other flowers. Contains five active ingredients: rotenone, pyrethrum, DDT, Fermate, and sulphur. Beautifully packaged in a puffer duster. Controls: black-spot, rust, mildew, Rose slug, aphids, thrips, beetles, and caterpillars.

	List Price Each
8-Oz. Duster	\$1.00

ARSENATE OF LEAD

Widest used arsenical insecticide. Safe on tender foliage for control of chewing insects. Controls grubs in lawns, and bag worms. 65c per lb.

ORIGINAL "SNAP-CUT" PRUNERS

World's best known pruner. Special bronze cutting anvil that does not injure cutting edge—handy "finger-tip" catch—all cutting parts easily replaceable—comfort-shaped, non-pinching handles—rust resisting finish—8 inches long. Takes 3/4 inch branches. Price: \$2.75 each.

"LIGHTNING CLIPPER" HEDGE SHEAR

Finest cutlery steel, flame hardened edge blades—long bevels and thin, keen edges. Top blade has sharp, hooked teeth to grip twigs for easy cutting. Hardwood handles, two color lacquer finish, pinned to the tangs of blades. Outstanding shear in performance and durability. Blade 9 inches long. Price: \$3.25 each.

Red-Leaf Plum

RED-LEAF PLUM

A handsome small tree covered with pale pink plum-like blossoms in early spring. The foliage is purplish red and does not turn green in summer.

	Each
4-5 feet	\$1.50
5-6 feet	2.00

Ornamental TREES

BECHTEL'S DOUBLE FLOWERING CRAB

A small, upright tree with erect growing branches. In late spring the limbs are literally covered with delicate pink flowers an inch or more across which resemble small Roses.

	Each
2-3 feet	\$1.50
3-4 feet	2.00

MAGNOLIA GRANDIFLORA (Southern Magnolia)

Most majestic and stately of all our broad-leaved evergreen trees. Ultimate height of 50 feet. The leaves are a glossy, bright green, and the large, fragrant, white flowers scattered from April through June make this tree most conspicuous. To reach its full dignity, should be planted in rich soil with ample room.

	Each
2-3 feet	\$3.00
3-4 feet	5.00
4-5 feet	7.50
5-6 feet	10.00

DOUBLE FLOWERING PEACH

One of the most beautiful ornamental trees. In early spring it is completely covered with Carnation-like blossoms, followed by green, glossy foliage. A fast grower and sure to be the talk of your neighborhood. These trees will bloom this spring and develop into a mass of beauty in another year. Colors available in pink, red and white.

	Each
4-5 feet	\$1.50
5-6 feet	2.00

Tree Wistaria

TREE WISTARIA

Tree form of Chinese Purple Wistaria. Formal small tree with free blooming, large clusters of lilac-purple flowers. All plants grafted from blooming wood. Will produce blooms first year.

	Each
4-foot standard	\$5.00
5-foot standard	7.50

REDBUD

Large shrub or small tree, whose branches are completely covered with rosy purple flowers in March before the leaves appear. A satisfactory flowering tree because it is so hardy, has no diseases, and has handsome, heart-shaped leaves. Why not start a "Redbud Trail" in your community?

	Each
3-4 feet	\$1.00
4-5 feet	1.50
5-6 feet	2.00
